

## The Three Card "Yes or No" Spread

Three Card Spread's are useful to get a yes or no to questions. Have the person asking the question shuffle the cards any way they want and hand them back to you. Have them pull three cards. Lay them out from right to left in the order given to you.

Two cards (or more) face up is a yes; two cards (or more) in reverse is a no.

This reading would indicate a "Yes" answer. Once you have your yes or no answer you can read the cards. Watch for relationships. Are there Majors, or are all the cards Minors (like this one). Can you guess what the question as from these cards?
